For the rel option:        sexylightbox  
for the Href addon:       &TB\_iframe=true&width=853&height=450 http://www.ari-soft.com/images/fbfiles/images/Bildschirmfoto\_2012\_01\_31\_um\_23.png

Does "href" attributes contain only &TB\_iframe=true&width=853&height=450 ? It is an incorrect.

We can recommend to ask help "designcompasscorp" team because the error which appears into the lightbox is related to their extension.
