
Content exits normally, but shading sticks

Posted by enoctis - 2013/04/20 20:04

I've used this plugin before without any issues, but now I've got a nagging problem. The nature of lightbox is to shade out the rest of the page and show the desired content in a non-shaded popout. This portion works as intended, but when I close the popout, the site remains shaded until it's manually clicked.

Any suggestions?

Hello,

Where we can see the problem?

Regards,
ARI Soft
