
Not opening in pop up instead opening in new page

Posted by iinf - 2013/07/16 06:23

Hello friends,

I am implementing the code at aap ki awaz . com (please remove space). At the link text "Show aaaa HTML", but instead of getting opened in modal popup it is landing on the target page. Please guide.

Hello,

"ARI Sexy Lightbox Lite" is a content plugin. Joomla! executes content plugins only in articles, it doesn't execute them in module or other content.

If you want to use the extension in any content, you can be interested in ARI Sexy Lightbox package. It contains the module and the plugins which can work in any content.

Regards,
ARI Soft
