## Error 404 on iframe link to Google docs

Posted by IMihaylov - 2013/12/16 10:23

---

Hello,  
I trying to set up an image button to be linked with pdf hosted on the server and to be opened by Google docs in lightbox.  
So the code that i use is:

After i try it like this the lightbox works but the page is not loading... Until several hours it had 404 Error insted of the white screen in the lightbox... Could please suggest me something...  
I still newbie in Joomla, but the "amp" after each "&" is auto-generated, so could that be the problem?

Also little off topic, but is it possible to setup the Lightbox to work with ARI Docs. I mean the document to be opened by the ARI Docs not Google docs or something like that...

Thank you very much in advance for the spared time on my question and keep up the good work!!! :)

P.S.: Please excuse me for any caused inconvenience by my stupid questions...

Hello,

Send a link to a page where we can see the problem.

Regards,  
ARI Soft

The page is:

<http://malkotarnovo.org/joomla30/>

It's the first green button..

Thank you for your collaboration!

Best regards,  
Ivan Mihaylov

Actualy i came to conclusion that the culprit is the content editor which is transforming the "&" to "&#amp;" and can't turn that off... In my case that is JCE... If you have any experience whit this extension could you share it whit me because i'm in dead end...

Also is there a way to use ARI Docs code instead of link?

Thank you very much and sorry for wasting your time... i guess my browser cached or something...  
Thank you once more!
