## Define plugincode instead of rel=\"sexylightbox\"?

Posted by nick - 2014/03/01 22:19

---

Greetings, I used the light version where you could change the text that triggered the lightbox-plugin (change "sexylightbox" in the link

Hello,

See "rel" attribute" parameter in plugin settings.

---

Sorry, we supposed your asked about "ARI Sexy Lightbox Lite". "ARI Sexy Lightbox" extension doesn't provide this parameter, but it is possible to resolve this problem with help of "ARI Sexy Links" plugin. For example if you want to use the lightbox for elements with rel="lightbox" attribute, set "Elements CSS selectors" parameter to the following value:

"A"

Could you provide a link to a page where we can see the problem?

Regards,  
ARI Soft
