Hello,

Add the following CSS rule to a site template CSS file:

```
#SLB-Wrapper
{
  left: 0 !important;
}
```

Thanks for your quick response

I added the rule - it doesn't have an effect. tried changing the 0 to - 300, still no effect.

Once the rule is added how do I implement moving the light box to the left?

The lightbox is shown at left side instead of center for us. Clean browser's cache.
