
No Lightbox at all

Posted by webhelpus - 2014/05/11 18:34

It's not loading up a lightbox at all, just loads the page

Hello,

Do you use this code in an article?

Regards,
ARI Soft

Re:No Lightbox at all

Posted by webhelpus - 2014/05/11 19:37

Actually in a custom HTML module. But the same would be used for an article.

It can be a conflict with a 3rd party extension. We can investigate the problem if you send a link to a page where we can see it.

Regards,
ARI Soft

If you want to use the plugin in "Custom HTML" module, set "Prepare Content" parameter to "Yes" in module settings.

Regards,
ARI Soft

Re:No Lightbox at all

Posted by webhelpus - 2014/05/11 20:06

Well, changed things, but not how I expected.

Re:No Lightbox at all

Posted by admin - 2014/05/11 20:11

You use the incorrect code. It should look like:

more

instead of:

more

Code samples are available here.

Regards,
ARI Soft

Re:No Lightbox at all

Posted by webhelpus - 2014/05/11 20:13

I've appended the `?TB_iframe=true&height=450&width=800` to the code and if I do the link based on the menu it says "Category not found" and if I do it based on the actual link it gives me a 500 Error.

Also, anyway to get just the article to show and not the whole template?

Re:No Lightbox at all

Posted by admin - 2014/05/11 20:45

Add tmpl=component parameter to URL if want to show show only content without header, footer and other elements.

What link do you enter in module settings, it looks incorrect on frontend.

Regards,
ARI Soft
