Joomla 3.4.0

ARI Sexy Lightbox Lite ver 1.2.0

I need to open a popup when a menu item is clicked, so I configured the menu item as:

Menu Item Type: Single Article

Select Article:

=====

Hello,

"ARI Sexy Lightbox Lite" provides ability to open the lightbox when a hyperlink (text, image) is clicked into an article. It doesn't support ability to open menu items into the lightbox.

It is possible with ARI Sexy Links plugin from ARI Sexy Lightbox package.

Regards,

ARI Soft
