
lightbox appears behind a swf animation

Posted by jemunoz - 2010/08/30 00:10

Hi there,
please excuse my english.
I just installed ari lightbox lite (plugin), it really works amazing!!

I use Joomla 1.5

but I had a little trouble, when you click the image, the lightbox appears behind a swf flash animation, i don't know what to do.

i just tried with css, setting the z-index:-1 in the div that contains the swf.

Thanks a lot!!!!

here is an example <http://www.ari-soft.com/images/fbfiles/images/image1.JPG>

Hello,

It seems the flash object doesn't contain `wMode="transparent"` attribute. If you provide link to page where we can see this issue we can investigate it in more details.

Regards,
ARI Soft

Thank's a lot, that was the problem: parameter `wMode="transparent"` missing.

thanks for your really quick answer!!!!
