
Light box for image

Posted by Beata - 2011/03/19 14:09

Since I started to use Joomla 1,6, I can't find simple lightbox effect for image in text

I have installed:

ARI Slick Gallery

and can't find a way how to do rokbox effect for simple image placed within text

I would appreciate some help, please

Hello,

Sorry, we know nothing about art extensions. "ARI Slick Gallery" can be integrated with "ARI Sexy Lightbox", "ARI Colorbox", "ARI Pretty Photo", "ARI Fancybox", RokBox, Shadowbox and core Joomla! lightbox.

You can see demo integration with ARI Sexy Lightbox extension here.

Regards,
ARI Soft

But I do not want some integration. I do not need some gallery, I want to have one or couple images in the text with rockbox or lightbox effects

In Joomla 1,5 we had Rokbox, and even simple tag rel="rokbox" can give this effect

I think all these extensions are specified for galleries only. How to get simple effect on one image, which extension and how....

You can use ARI Sexy Lightbox Lite plugin for this purpose. It adds lightbox to elements with rel="sexylightbox" attribute.

I have installed this plugin, activated it and added rel="sexylightbox" to my image but didn't get some effects. Image opens in blank window like in ancient times.

Do I need something else to do?

Do you use code in an article? Is it possible to provide link to page where we can see the issue?

1. Here is the link for image:

<http://audrone.serveriai.lt/index.php/14-sample-data-articles/81-un-jubiliejus>

I tried `rel='sexylightbox'` and `rel="sexylightbox"` , but nothing work

2. Here is link for text:

<http://audrone.serveriai.lt/> the first line in the first article - "LGHD patvirtinti nauji gimines *Ū*enkilai (herbai) ir herbiniai *Ū*enkilai" - also don't work

What is wrong?

1. I have changed theme for plugin from default Black to other, since that all themes started to work (I got image effect). It seems that I needed at first theme to compell a lightbox to work

2. But nothing work for text link. You can see what happen with text link - I get small hole, nothing to see.

At least I have image effect, - thank you .

P.S. I have changed codes to this:

The pop window opens but nothing to see. What is wrong?

Text link works fine for us. See screenshot below please:

<http://www.ari-soft.com/images/fbfiles/images/lightbox-d78989ee79519a6608e13ba8da377862.jpg>

If it doesn't work for you, specify please what browser you use that we can try to reproduce the problem.

Regards,
ARI Soft

Wow !

My default browser is Firefox.

But interesting thing, that after 1 hour of break, I came to computer, found your message,
and it works for me with Firefox and with IE

Thank you very much for help
