
Ari Photo Gallery and Picasa

Posted by carlosprats - 2013/05/30 06:39

I'm having problem setting up my gallery using a picasa account. Actually I don't understand clearly what you mean when you say Picasa Username and Picasa Album. Is it any special way of doing it?

When I place
Picasa User: ***
Picasa Album:***

I get this error:
Warning: simplexml_load_string() : Entity: line 1: parser error : Start tag expected, '

Hello,

Set "Picasa user" parameter to iglesiasdeifre value and "Album name" parameter to the following value:

Consagraci3n a la Virgen 26 Mayo 2013 - Pastrana

I did it and now I can see the thumbnails of the pictures but when I click on them the pictures didn't enlarge. You can check by yourself at www.iglesiasdeifre.com (at the bottom of the main page)

I also tried with regular pictures that I have in my server and I only can see the thumbnails.

Thanks,
Carlos Prats

This problem with extension which is used on your site to optimize loading of javascript files. It removes MooTools library, but doesn't remove Joomla! javascript code which uses MooTools due to javascript error occur. You can see it in browser's error console. This error is not related to "ARI Photo Gallery" but it prevents execution of "ARI Photo Gallery" javascript code so the lightbox doesn't appear.

PS: We can investigate the problem in more details if you provide a temporary access to your J! backend by email.

I already sent you by email the info you requested.
Thanks

Try now. It was the problem with configuration of "JCH Optimize" plugin. We set "Defer javascript" parameter to "No".

Regards,
ARI Soft

Now it's great.
I never saw a support like this.
Thanks,
Carlos Prats
