## options

---

Hi,

I have installed the Ari Photo Gallery. I have installed both the "System - ARI Photo Gallery Anywhere" and the "System - ARI Extensions". Both are enabled and The actual Gallery works. My problem is the options in the module don't work. Specifically I have tried to change the Gallery Name, The Style and the Items Per Row" They save but nothing changes on the front page. I have tried clearing my browser history.

Any Ideas?

Thanks

=====

Hello,

Try to clean Joomla! cache. If it doesn't help, could you send a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?

Regards,  
ARI Soft
