
Scroll Bar on popup view

Posted by mattrbailey - 2013/12/29 14:39

Hi,

I have ARI photo gallery linked to my Flickr account. I have a single click able image. This then loads all the photo's in the photo set. The issue I have is the Kite or Wedding sets have a lot of photos. When you click the button to view all the photos (once the popup has opened) there isn't a way to scroll through them.

is there anyway this can happen? or can it be added as a feature request?

Hello,

Could you provide a link to a page where we can see the problem?

Regards,
ARI Soft

<http://www.digital-images.co.uk/index.php/gallery>

click on the Kites or Wedding photos to see my problem. Too many images are in the set. This means you can't scroll up and down.

Thanks that worked perfectly.

A Note for anyone using the Gantry template. You need to edit the .less files. Not the CSS files. These are located in the /templates//less/ directory.

I edited the global.less to make this work
