
Image directories modification in a Joomla article

Posted by prince25 - 2014/01/12 11:50

Hi,
i have inserted the following syntax test of ARI Photo Gallery plugin in a Joomla article.

```
{ariphotogallery moduleId=""}/ariphotogallery}
```

It works. But i would modify the parameters about the image directories and thumbnail size of Ari Photo Gallery module for each Joomla article in order to different parameters for different articles.

thanks.

Hello,

Use the plugin in the following way:

```
{ariphotogallery activeType="imglist" dir="images/stories;images/banners" thumbWidth="150"}Show  
gallery{/ariphotogallery}
```

Regards,
ARI Soft
