## Ari Photo Gallery and ARI Eext Menu on same page

Posted by tommie3765 - 2015/01/20 10:00

---

hi guys

if I use photo gallery and Ari Ext Menu on the same page the menu is appearing on top of the light box. (IE V11)

anyway of preventing this?

<http://testsite.yarravalleyrailway.org.au/index.php/about-us/latest-news/83-tie-renewal>

also have a video in and iFrame....

ideally the light box would be in front of everything, as per our demo page :unsure:

Hello,

Decrease value of "z-index" parameter in "ARI Ext Menu" module settings, for example set it to 50 or add the following CSS rules to a site template CSS file:

```
.mb_overlay {z-index:30000!important;}
#mb_gallery_ {z-index:30001!important;}
```

Regards,  
ARI Soft
