
ARI Photogallery and PHP 7

Posted by wedontbyte - 2017/04/26 16:13

Hi

I've just tried to upgrade to PHP 7 after updating to Joomla 3.7.0 and I get the following error message:

Deprecated: Methods with the same name as their class will not be constructors in a future version of PHP; plgSystemAriphotogalleryanywhere has a deprecated constructor in /home/sites/heswallu3a.co.uk/public_html/plugins/system/ariphotogalleryanywhere/ariphotogalleryanywhere.php on line 24

Is there a fix as this error appears on the web site front end as well as back end.

Many thanks.

David

Hello,

Download and upgrade the plugin to v. 1.5.4.

Regards,
ARI Soft

Thanks.

That's fixed it.
