Photo Gallery not popping up lightbox and

Posted by alisamii - 2010/08/09 14:02

_____

Hi:

I just installed ARI PhotoGallery on a site where I also have ARI Fancybox.

I have 2 issues.

1. Although I can parameter the module to show 3 random images from the photos (local on system), clicking on them makes no difference. The lightbox does not open so the gallery does not show.

2. There is no parameter for adding a "module class suffix" which is also a problem I have with ARI Fancybox.

Can you help me solve the first issue and can you implement a parameter for adding a "module class suffix" in both ARI Photo Gallery and in ARI Fancybox.

Thank you.

Ali

_____

Hello,

Regarding the second questions, we have updated 'ARI Fancybox' and 'ARI Photo Gallery' modules and new versions provide possibility to set module class suffix. New versions can be donwloaded in 'Member Area' on our site.

About the first question, could you provide temporary access to page where we can see this issue, it can be conflict with some extension(s).

Regards,
ARI Soft

_____

Hi:

Thank you. I installed both new versions.

Regarding the login to the admin interface, you have that already. It is the "Les Amis de Stan" site in French. If you need me to send the login info again, please let me know.

I also was wondering if you had addressed the pre-loading of images issue in ARI Fancybox as per thread http://www.ari-soft.com/ARI-Fancybox/6237-Still-can-t-get-Ari-Fancybox-to-work-for-me.html

This ia real issue for me. The front page of the site http://thesamiis.com/todebug/ loads about 50 flickr photosets, and these photosets have almost 6000 pictures in them. There are more that I have not linked yet. It really slows access to the site.

Also, and not mentioned before, some of the photos are in collections (groups of photosets that have been put together in a collection). It would be easier and better if I could reference collections using the collection ID, if that is possible. It makes the code cleaner than sourcing 10 photosets.

Thanks,

Ali

_____

Hello,

We have updated 'ARI Photo Gallery' and 'ARI Fancybox' modules. Download and upgrade them, please. If you want to use 'System - ARI Photo Gallery Anywhere' plugin, use it in 'Anywhere' mode or with 'ARI Photo Gallery' module because your site template replace all images in articles for blog and frontend layout, you can see it in the next files:

\templates\ja_pyro\html\com_content\category\blog_item.php

\templates\ja_pyro\html\com_content\frontpage\default_item.php

\templates\ja_pyro\html\com_content\section\blog_item.php

Regards,
ARI Soft
