
demo looks nice - few questions

Posted by sgr - 2008/04/13 02:37

hi,

i am running joomla for my intranet. i am looking for quiz component like this looks nice, but my questions.

1. Want to make sure only once the user attend the quiz
2. once finished the result shud be emailed not shown on screen. the email shud catpure his logged in username & email.

Thanks
SGR

Hi,

You can allow access to the quiz to a definite group of users, to look at this possibility please go to the backend part of the component:
http://demo.ari-soft.com/administrator/index2.php?option=com_ariquiz&task=quiz_list.
While editing/updating a quiz you can also have a look at this possibility. Besides you can deny access to the results of the quiz. In order to do this don't set template for showing quiz results while editing/updating a quiz. You can also set an e-mail for sending test results.

Regards, ARI Soft
