Hi,
I just purchased your ARIquizz, but the installation failed... Please tell me what to do.

* JInstaller::install: SQL fout. DB function failed with error number 1064

You have an error in your SQL syntax. Check the manual that corresponds to your MySQL server version for the right syntax to use near 'DEFAULT CHARSET=utf8' at line 11 SQL=CREATE TABLE IF NOT EXISTS `jos\_arigenerictemplate` (`TemplateId` int(10) unsigned NOT NULL auto_increment, `BaseTemplateId` int(11) NOT NULL, `TemplateName` varchar(255) NOT NULL, `Value` text, `Created` datetime NOT NULL, `CreatedBy` int(10) unsigned NOT NULL default '0', `Modified` datetime default NULL, `ModifiedBy` int(10) unsigned default '0', PRIMARY KEY (`TemplateId`)) ENGINE=MyISAM DEFAULT CHARSET=utf8;
SQL =

```
CREATE TABLE IF NOT EXISTS `jos_arigenerictemplate` (
  `TemplateId` int(10) unsigned NOT NULL auto_increment,
  `BaseTemplateId` int(11) NOT NULL,
  `TemplateName` varchar(255) NOT NULL,

ARI Quiz component requires MySQL 4.1+ to work correctly. Our component uses some features that are not available in MySQL 4.0. So if you are able please upgrade you database to this or later version. MySQL 4.0 is no longer supported by the manufacturer: <http://downloads.mysql.com/archives.php?p=mysql-4.0>

If this variant does not suit you we will charge your money back.

Also we have updated the component page with system requirements: <http://www.ari-soft.com/Joomla-components/ARI-Quiz/Detailed-product-flyer.html>

I upgraded the MySQL and installed the component.
Hope everything will be fine like this.
Thanks for your quick support!
Thomas
