Share on facebook

Posted by rotta - 2009/02/04 07:24

_____

Could anyone point my in the right direction on how to share the quiz results on facebook?

I can see that facebook have a developer community on to make facebook applications, and an easy approach to how to share links. But I would like to have my php make a message based on the resultats and then post it to the fb-profile of the user.

Hello,

We didn't work with FaceBook developer API. We are researching it and will let you know.

Regards,
ARI Soft
