
Free Text Questions (question)

Posted by cos - 2011/02/17 11:08

Hi

Has anyone ever reported a problem with free text answers in Greek language?

The greek answers are with accent on top of some letters but we are giving the option of not using one.

Some players reported that although giving the correct answer to the question, the system was saying it was wrong. I am trying to figure out if we have skipped some possible answers or if the free text question has some glitch in terms of answers with more than one word or with greek language in general. Note that we have over two hundred registered users and they are using all sort of different computers, browsers and operating systems. Another thing is that the majority of the users are playing nearly at the same time i.e 4pm every monday, so is there a case of database mishandling? I have to make sure until Sunday that the system is reliable.

If any of the above sounds familiar or you have thought of any possible problem please let me know.

Thank you

Cos

Hello,

Could you provide sample of question(s) with answers which cause the problem and provide information what version PHP and MySQL is installed on your server?

Regards,
ARI Soft

Hi.

Thanks for your response. I don't know what sample to give you because the questions are in greek.

Anyway I have attached an image with the question.

http://www.ari-soft.com/images/fbfiles/images/_922__945__964__945__947__961__945__966__942_.JPG<http://www.thisavroi.com/images/example.png>

The answers are:

mesologi
¼µÃ¿ » ¿³³¹
¼µÃ¿ » ¿³⁰¹
¼µÃÉ » ¿³³¹
mesologgi
mesologki
messologki
¼µÃ¿ » ¿³³¹

PHP: 5.1.6

MySQL: 5.0.77

Any ideas?

Thank you
