## Feedbacks - my request

Posted by 4creator - 2008/08/03 14:43

---

Hello,

I send you my feedbacks. I wish these requests are reflected on the next version. :)

Email sender control

Can I set "e-mail sender" details (sender name/email address) for task=quiz\_finished?

Title for web browser

No title for web browser now... I want to add title (ex. Quiz name).

Alert message

When I set the group of users to "Register", user can not do the quiz. But they can access to enter-page for the quiz. I think this page must show alert message, like "Register to do this quiz...". (oh, my poor-english!)

Integration

JoomFish integrationAllVideos Reloaded integration

Sorry for my broken-English always.

Thanks,

Hideto

Hello,

Thanks for your valuable feedback and suggestions. We will think about including them into the next version of the component. We will try to make ARI Quiz better with your help.

Regards,

ARI Soft

Email sender control

Can I set "e-mail sender" details (sender name/email address) for task=quiz\_finished?

Is there this request in your ToDo list?

I think this request is important for every ARI Quiz users.

I hope it is realized early.

Hello,

We'll add this feature into the next version of the component, which will be available at the end of the next week.

Regards,

ARI Soft

Hello,

ARI Quiz component has been upgraded to 2.1.1 version.

New features:

- Mail templates
- New comment field for questions. It will be shown while displaying quiz results
- More informative messages added for the case when user is unable to take the quiz
- Some minor bugs fixed

Regards,  
ARI Soft

Hello,

Thank you for upgrading to 2.1.1!!  
Sorry for my delay reaction.

I found an issue about Mail templates. Please see a file I attached. I am testing 2.1.1 from today. If I find something, I'll report it to you again.

Thanks,

Sorry, my issue was solved.

I accessed to Language (Labels), and I clicked Save-button. ARI Quiz recognized new words for my language.  
:blush:

Thanks,  
Hideto
