
1: Own Answers on QuizResults 2: login for result

Posted by pino - 2011/02/26 15:46

Hey Dudes, is it possible to get own quiz results..

that means :

someone get 60% so it should not stay 60% there on the resultpage ..
something like ... if \$result = "60" then echo Nice Stats
on 70% well done
80% great

or something like that.
perfectly would be if you can configure the answers for each quiz !...
thx a lot

2nd Question:

is it possible to set the "must login" function before show result, and not before start quiz

thx a lot !

Hello,

1. Yes, it can be done with help "Result Scale".
2. The extension doesn't support this ability, but it can be done as custom development.

1. "Show Full Statistics" parameter in quiz settings is used for this purpose.
2. Can discuss it by email.
