Average score

_____

Hi, I need to include an 'average scores' module to my quizzes. This would calculate an average percentage from all results recorded. How can this be done?

Plus After the quiz is finished, could there be some kind of comparing your own results with others'? in %? Making it graphical would be awesome

Thx

Re:Average score

_____

Hello,

If you need module for 'Average score' urgently, you can order custom development or can submit feature request here and we will implement it in a future release of the extension.

About comparing results, add feature request here.

Regards,
ARI Soft

Re:Average score

_____

I already made a post for the Comparative application in Feature Request. When is expected to come the new upgrade? What are the chances the functionality will be included?

About the 'average score' module, what are the terms? In case I order it custom made, wich would be the cost? How long would it take?

Thanks

Re:Average score

_____

Currently we are working on new version of the extension (v. 3.0). It will be compatible with Joomla! 1.6 and under GNU GPL license. We are going to release it within 2 weeks, after this we will start to implement feature requests. If you are interested in custom development of "Average Score" module, contact us by email please and we will discuss details.

Regards,
ARI Soft
