Virtuemart Integration

_____

Is it possible to purchase one quiz at a time through Virtuemart rather than use this with OSE Memberships? I am looking for a solution to offer courses online with the student having the option of only choosing the quizzes he wishes to pay for.

Hello,

Currently the extension doesn't provide this ability. OSE Membership provides ability to organize subscriptions to quiz categories. We are going to add ability to organize subscription to specific quizzes in new version of the component (v. 3.0)

Could you provide me with a quotation to perform this modification? I only want a student to be able to browse all of the quizzes and choose to buy the ones he wants to take using Virtuemart. I do not want to charge for memberships.

Alternatively, can you suggest a way of doing this with the current software or with the upcoming 3.0?

_____

Current version doesn't support this ability, we will add it to a new version of the component.

_____

DO you have an idea of when the next version will be available?

_____

We will try to implement the feature within 1.5 months.
