Rearrange the Full Statistics layout?

Posted by guck - 2009/02/15 10:20

_____

Hello,

I am needing to rearrange the presentation of full Quiz results. For example:

Hide 'Question Category', 'Question Type' and 'Total Time'
Change the order of 'Question', 'Note', and 'Correct Answer'
Rename 'Note' label

Can this be done? What file or files would I modify to do this?

_____

Hello,

According to your questions:

1) Currently you can hide unused rows with help CSS rules. You can add to CSS Template the following rules:

tr.ariQuizStatTrCategory td, tr.ariQuizStatTrQueType td,
tr.ariQuizStatTrTotalTime td
{
  display:none !important;
}

2) Layout for quiz statistics located in javascript file, but this file is obfuscated.

3) You can change all labels on backend of ARI Quiz in section 'Languages Frontend'.

Regards,
ARI Soft

Wow, thank you for this very fast answer! It worked great! Thanks for your help. :cheer:

I forgot to ask..

Is is possible to change the default number of results shown per page?

_____

You are welcome :) Sorry, but now it isn't possible to set default number of items per page on statistics page. But you can submit feature request about this feature and we implement it in one of future releases.
