
Cannot connect to server

Posted by mtl83 - 2011/03/20 16:04

Hi,

I wonder if anyone can help me with a recent problem. I tried to access one of my own quizzes today but got the error "Cannot connect to the server". The quiz itself loads, but does not load questions. The SAVE button appears to progress to the next question, but after clicking it, the same error comes up again. I'm guessing there's a problem with the database that the questions are stored on, but i'm not sure.

Does anyone know how to investigate the cause / fix it?

Thanks!

-m

Problem solved - was accidentally testing with the latest release candidate of Firefox v4.

Hello,

Could you specify what version of the extension you use that we can check it in FireFox 4?

Regards,
ARI Soft
