## Quiz Result Spent Time with milliseconds (ms)

Posted by cos - 2011/03/22 13:06

---

Hello.

My quizzes have to do with time that one answers the questions. The problem is that I have many people answering with the same time and therefore I can't have a winner.

I would like to know if it is possible to have milliseconds in the time spent in order to minimize the possibility of having more than one winner.

Thank you

Cos

Hello,

We can provide custom version of the extension which will show spent time in milliseconds on component backend. If you are interested in it, contact us by email please.
