User name

Posted by magzaragoza - 2011/03/27 17:43

_____

Hi I'm testing your product, but the username real "take me I can change it somehow? I want to leave the username is not the real name.
Thanks

_____

Hello,

What username you mean?

Regards,
ARI Soft

_____

Hello
For my users log CBlogin use, ask the real name registration and user name.
Ari quiz, component and assembly does not take the username, making the actual name.
Ie example, a user:
Real name: Miguel Angel
Username: ilien
Miguel Angel Ari quiz out
Excuse my English, and translate it online.
Thanks

_____

In what page do you want to change this value? On quiz finished page?

Regards,
ARI Soft

_____

If I could be better in modules (mod_ariquizresult and mod_ariquiztopresult) as it is visible to all users on the page that you say does not matter because it is only seen by the user doing the quiz.
Thanks

_____

It is possible to choose what should be shown on frontend user name or login name in the modules.

Regards,
ARI Soft

_____

And you can tell me how to do it or is it complicated?
I do not understand well, I changed the username for loginname code does not work.
Thanks
