
results for a quiz

Posted by sleming - 2009/02/26 18:57

Is there a way to tally all the correct and incorrect answers for a quiz that everybody has taken. I want to see where my class weak. It's going to be difficult to look at each individuals score and tally the right and wrong answers manually.

Hello,

Currently it isn't possible. You can submit feature request for this functionality or order custom development.

Regards,
ARI Soft
