## Quiz appears to load and then disappears?

Posted by kirkhayes - 2009/03/01 23:56

---

Hello,  
I am having no luck getting this to work. It appears to be loading, but then it vanishes and there are no questions to be taken.

Can someone please help me get this configured so it can work?

The url is <http://ducatiusa.com.previewdns.com/home>

It appears to have been an issue with my cache. I cleared my private data (firefox) and the questions are loading correctly now.
