Empty Buttons after update

Posted by photovoltaik_web_de - 2011/04/13 16:56

_____

Hi,

after upgrading Ari-Quiz to the latest version, the text on the buttons "Save" and "Calculator", which are displayed below the questions is missing. Buttons are very small and without any letters, so the user must be quite confused. I tried to change language and other things, but there's no change. Before updating everything was shown without problems. (I already sent you an E-Mail few days ago regarding this problem, but so far I didn't receive any answer, so I try it this way)

Regards

==

Hello,

Could you provide link to page where we can see the problem and temporary access to your Joomla! backend by email that we can investigate it?

Regards,
ARI Soft
