
Problem in 1.5 version

Posted by Guido - 2009/03/09 16:53

Hi,
Yesterday I purchased a license ARI quiz, I downloaded the file "com_ariquiz.zip" Member Area, I entered the domain name "crystalnails.it" but during installation on Joomla 1.5 comes out wrong. What's wrong?
Thanks.

Hello,

Can your describe your problem in more details? Blank page appears or any error message shows? You can try install the component from directory. For this upload com_ariquiz.1.5.zip by FTP to your server, unzipped it and choose 'Install from dir' option on Joomla installation page.

Regards,
ARI Soft
