
Questions Font color and css settings change

Posted by BillyHC - 2011/05/09 12:28

Hi,
I've encountered a somewhat funny issue.

On the attached screenshot you can see that my question on quiz page is colored black, although all my css files specifically states they should be white.

I don't know where this extra code comes from, so I am hoping you can help me out.

I saw an old post from mid-2010, but after adding the #ariquemaincontainer css details, nothing happens still. It is still inserting a
<http://i.imgur.com/ZMSvu.jpg>

Best Regards

Hello,

Could you provide link to page where we can see the problem? If it is private data, you can provide it by email.

Regards,
ARI Soft
