No trial version?

Posted by jlb4350 - 2008/08/06 17:55

_____

Is there a trial version out there somewhere that I can install to make sure it works with my site before I drop $75 on this component? I looks great and is just what we are looking for, but I would like to be able to try it out first on my own site. If it works, I'll gladly pay $75 for it!

Is there a limited feature version that can be used as a trial?

Thanks.

Hello,

Thanks for your interest.
We don't offer trial version. All the functionality can be viewed/tested on our test servers:
Joomla 1.0.x: www.demo.ari-soft.com
Joomla 1.5: www.demo2.ari-soft.com

Once you purchase the component we provide you with 2-weeks temporary license. If the component does not work for your system for some reason and we cannot help you install make it up and running in this period we will give you a refund. If the component works with no problem we will give you full license.

Also you can have a look at ARI Quiz customers: http://ari-soft.com/Latest/ari_quiz_customers_country.html
They have the component up and running;)

Please contact us if you have any other questions.

Regards,
ARI Soft

That sounds like a good deal. I just have one more question. At the end of a quiz, can it be configured to display the answers that the user answered correct and incorrect so that the user will know which questions they need to study? If this is possible, we will more than likely go ahead and purchase a license. This seems to be a great component!

Thanks for your speedy reply :)

We are going to add functionality to view detailed statistics next week. The other thing we are going to add within two months is letting user know right after the answer was the answer right or wrong.

If you puchase the component you are getting 1-year free updtes and fixes.

Regards,
ARI Soft

Purchased today and have been testing it. These features you described above seem to be features that we will need for our testing purposes, so we'll keep checking for the updates.

Great software though!
