
Changing Template

Posted by stefangr - 2009/03/23 20:41

Hello,

First of all very nice work and support!
Please tell me how can i change the look of my quizz pages?
Where are the templates? I have a site with black background
and i want to put some borders and other stuff to make look better.
Please provide me with some help.

Hello,

You can create your own CSS file in 'Templates' section on 'ARI Quiz' backend and assign this template with quiz on quiz settings page.

Regards,
ARI Soft

Hello,

Sorry for delay. By default using CSS file which you find by the following path: /components/com_ariquiz/css/default.css
You can change this file or create template in 'Templates' section and type changed CSS file in template text.

Regards,
ARI Soft

Re:Changing Template

Hello again,

I made some changes but nothing new appears!
I want to put some borders around the first page of the ari quiz.
For example around the main categories and the names of the quizzes.
Also borders around the questions and so on.
Can you give me some help for this?
Thanks

This template apply only for quiz page and for quiz finished page. If you need customized page with category or other page then you can edit appropriate page template which you can find by the following path:
`/components/com_ariquiz/view/` .

quiz_list.html.php - page which shows quiz categories
quiz.html.php - page which shows quiz description
question.html.php - main quiz page.

Regards,
ARI Soft

Hello,

I have made some changes but the client wants something else. Not difficult for you. Can i send you and email to show you how he wants the categories to appear with the quizzes? Is there an email i can forward the email?
Just 20 minutes of your time i believe.:)

Hello again,

Did you get my email? Is everything clear?
Waiting for your answer.

Thanks again
