
Adding additional Params to Text Templates?

Posted by mstaehli - 2009/03/25 21:04

How can I add an additional parameter to the Params List in texttemplate_add?

I need the score per question for my statistics.

something like this:

DBSide: jos_ariquizstatistics: QuestionIndex and related Score
Backend Params: {\$ScoreQuestion_n} where n is the Question#
Forntend: "30"

Theoretically it shouldn't be a big effort :unsure:

Any help?

Hello,

You can order custom development this feature. Or you can write content plugin which will replace variables in necessary values.

Hello,

It will cost 1 work unit (<http://www.ari-soft.com/Custom-Development/Support/Work-Unit/Detailed-product-flyer.html>)

Regards,
ARI Soft

LetÒ's do it!

Two more questions:

- Are the specs clear enough?
- Will the new param also appear on the other templates?

Works perfect on test environment - will deploy on live server soon.

Thank you very much - excellent service!

:)
