attempt number in results page

Posted by alexh - 2009/03/27 03:14

_____

Hi, I'm testing Ariquiz and I want to know if it's possible to print in the results page the number of attempts of a user in a quiz. Something like this: "4 of 5 attempts"

Thanks in advanced :)

_____

Hello,

Sorry, currently text templates don't support this parameters. But you can submit feature request and we'll implement in one of future releases.

Regards,
ARI Soft
