See more fields in Quiz Result List

Posted by hovmedia - 2011/06/23 07:21

_____

Hi!

I have added the line "company name" in register form for Joomla users. Is it possible to get this field up in the Quiz Result List?

I have a lot of hired persons taking safty test for a production area, and need to sort them by company in the result list.

_____

Hello,

If you provide information about table structure where "company name" field is stored, we can create custom version of quizzes results page.

PS: You can provide necessary information by email.

Regards,
ARI Soft
