The customization function of the layout
Posted by 4creator - 2008/08/13 02:46
_____

Hi,

Thank you for your nice product. :laugh:

My quiz sometime has many answer-choices. (Please see my attached file for your reference.)

If the quiz has many answer-choices, my users have to scroll all the way down to find the answer.

It would be nice if I can choose the layout (e.g., 2 or more columns).

Is there any way to do this?

Thanks,
Hideto http://ari-soft.com/images/fbfiles/images/sample.png

Hello,

Please write a letter to us with your requirements: how many answers, how many columns, what's the largest size of the answer.

We will estimate (approximately this is custom development of 1 work unit: http://ari-soft.com/Custom-Dvvelopment/Support/Work-Unit/Detailed-product-flyer.html).

Regards,
ARI Soft

Thank you for your quick work!
I received a zip file.

It seems fine. ;)

Thanks,
Hideto
