
Description disappears after clicking \"continue\"

Posted by wijnie - 2009/04/05 16:47

when actually starting the test,
after clicking "Continue"
The text filled in the field of description of a quiz question just disappears.
How to resolve this?

Hello,

Quiz description shows only on quiz starting page. You need additional information on page which user see during passing quiz?

yes it's a mp3 clip(spoken text), with some written additional information, which doesn't fit in title field it self.
People need to stay focus on listening to mp3 clip, while answering some questions about it.
And so i used the description field.
Where the title stays on top, the description, usually below it, disappears.

The component doesn't have possibility to show quiz description during passing quiz, but you can order custom development this feature, we can add new field on quiz settings page where you can set text which user will be see during passing quiz. It will cost 1 work unit <http://www.ari-soft.com/Custom-Development/Support/Work-Unit/Detailed-product-flyer.html>
