
Question images are not loading in the quiz

Posted by csmnatra.com - 2011/07/13 20:01

Hi,

In some of our quiz questions have images (simple question not hot spot). Images are not loading while trying the quiz. I searched in your forum and noticed that its a common problem and you have some plugin to solve this.

Can you please guide us as well to resolve this issue?

Thanks in advance! Hope to hear soon from you.

Regards,
Kapil Indoria

Hi,

Thank you very much for your quick reply. Now Images are shown in the quizzes.

We are also facing one more problem about module assignment on quiz description page and question page. Around a week ago we created a thread for the same. Please see the link <http://www.ari-soft.com/ARI-Quiz/16664-Module-assignment-not-working.html>

Its seems that you missed it. Can you please help us there as well? The problem is that the module assignment at quiz description and question page (after clicking the continue button) is not same.

We really appreciate your support. Hope to hear soon about this problem as well.

Thank you very much in advance!!!

Regards,
Kapil
