## Links in results list is wrong

Hi there

On the results answer and again on the results list we have links to articles, that can explain the users more.

6 out of 10 links is wrong...and just showing stuff like

<http://camera/>

<http://www.kkompositioner/>

<http://wwiintegrer/>

When it should be normal like:

[site.com/ index.php?option=com\\_k2&view=item&id=172&Itemid=113](http://site.com/index.php?option=com_k2&view=item&id=172&Itemid=113)

Please advise

Hello,

Could you provide link to quiz where the problem occurs and temporary access to your J! backend by email that we can investigate the issue?

Regards,

ARI Soft
