## Can't save and loading forever

Hello! My quiz was working properly before but when I changed hosting I cannot save my quizzes and settings. Also, the "loading.. please wait" doesn't disappear and I can't proceed to the quiz.

My site is [www.upcatreview.com](http://www.upcatreview.com). If you need my backend access I can email it to you.

Thanks!

Hello,

It seems that during change of hosting one file for 'ARI Quiz' was not copied. We sent instructions how to fix it on your mail.

Regards,  
ARI Soft
