## Problem changing questions

---

I am new to Ari Quiz but I am having trouble, I created about 12 questions in the question bank then I use some of these questions to create a quiz, now when I change a question that is in the bank I expected the question to change in the quiz but it did not, also if I add one more question to this quiz in the front end it continues saying 1 of 3 (for example) but I already have 4 questions seems that is not considering the last adding, could you please help me or tell me what I could be doing wrong

Hello,

It seems that you have a problem like in this post.

Regards,  
ARI Soft
