
forbidden - permissions access

Posted by Xargoss - 2009/05/06 21:49

Hi, I have problem with Ari Quiz 2.4.0

Often, when I click "save" on last question then I have blank site and message:

Forbidden

You do not have permission to access this document.

Should be display result page.

Sometime the same problem is when I click "continue" to see first question.

Quiz is only registered users. I don't know why this error appear. Please help.

regards

Xargoss

Hello,

It seems that you use sh404SEF component. If it's true then you can read about this issue of sh404SEF component [here](#).

ok, I know what the problem.

When I'm inside in quiz result or quizzes menu category (in joomla backend) then I can't display all frontend informations(I can't display quiz or results).

Simple, but after so many hours before the computer... ;/

regards

X.

Sorry, could you explain what you mean? Do you have new issue or you resolved previous problem?

Regards,

ARI Soft
