Hello.

I from Russia, therefore excuse for correctness of the message.

I have bought your product - ARI Quiz.

Has established on Jomla 1.5

Has created the test. Has added questions and variants of answers. But at a conclusion to a site why that isn't displayed a question, answers are displayed only.

Here an example

[http://mir-svadbi.info/index.php?option=com\\_ariquiz&view=quiz&quizId=1&task=quiz&Itemid=28](http://mir-svadbi.info/index.php?option=com_ariquiz&view=quiz&quizId=1&task=quiz&Itemid=28)

Prompt what to do please what the question was displayed? :(

Hello,

What browser do you use? Questions are shown fine on our side.

Regards,  
ARI Soft
