
question id

Posted by mmam - 2009/05/21 13:07

Sometimes a student doesn't agree with a certain question, and needs to identify the question id, in order that i can understand his doubt.

is there a way to do this? if there is, is there a possibility to put that information right into the question?

Thanks in advance, and regards

Rui

Hello,

Sorry, but currently the component doesn't support this possibility. You can submit feature request about this feature and we add this in one of the future releases or order custom development.

Regards,
ARI Soft
