
All tests appear as passed.

Posted by nestortoledo - 2009/05/22 12:04

Hi, i have ari quiz configured, for driving license tests.

Total of questions per test 30.

Score of each question. 1

Score needed to pass the test. 27

but if i made some test i get the results like this. 20/30. PASSED.

I've checked all the configuration of each test. and appear to be correct. also each correct answer have 100%

How i can solve this problem?

Hello,

It seems that you set 'Passed Score' option to '27' in quiz settings, but this option measures in percent. Set it to '90' and it should work as you need.

Regards,
ARI Soft
