
Result Template

Posted by Deshpande - 2009/06/10 11:00

Hi,

I am not able to change the font-size of the result page and also the font settings of the question options. Right now the question option font size, and font family doesn't match with my site. Kindly help me to change these.

Thanks in advance,

Regards,
Deshpande.

I am actually testing it on localhost and will be installing on the live site once these changes are done. I just need to reduce the font size of the question options and the Quiz Statistics page.

I am attaching a JPEG for your reference.

Try to add the following CSS rules to your CSS template file:

```
.ariQuizHeaderName,  
#ariQueMainAnsContainer,  
.yui-dt,  
.yui-dt .yui-dt-label,  
.yui-dt .yui-dt-label A,  
.yui-pg-container  
{  
    font-size: 15px !important;  
}
```

Thank you for your quick reply
Using the above CSS rule I was able to change the Quiz Statistics page, but Quiz Result font is still large.

'Quiz Result' doesn't use any specific font size, it uses font size which inherit from font size which defined in template.
You can define needed font size in 'Quiz Result' text, for example wrap it with `<tag>`:

... Quiz result text...

Re:Result Template

Posted by Deshpande - 2009/06/10 12:31

It did not change the font size. only the title "Quiz result" font changed

Re:Result Template

Posted by admin - 2009/06/10 12:40

Do you change it in 'Text Templates' section on the component backend? If yes, we have difficulties to provide the exact solution because we can't see which CSS rules apply on your page.

Re:Result Template

Posted by admin - 2009/06/10 13:16

Use the following, please:

```
.yui-skin-sam .yui-dt table
{
    font-family: verdana !important;
}
```

Hi,

I am still not able to change the font-family. I am attaching a jpeg file for your reference.

Re:Result Template

Posted by admin - 2009/06/11 06:15

Hello,

Add the following CSS rule:

```
table.ariQuizResults, table.ariQuizResults table
{
    font-family:verdana !important;
}
```

Regards,
ARI Soft
